

BANG TEXTILES & CLOTHING PVT. LTD.

House of mill made Fabrics...

ABOUT

Bang Textiles & Clothing Pvt. Ltd. is a dynamic fabric Trading company based in Bangalore, India. Founded in 2023, we specialize in producing a wide range of high-quality fabrics, with a strong focus on cotton. Our product line caters to diverse industry needs, from fashion and apparel industrial textiles.

As a manufacturer, we are committed to delivering superior materials that meet the evolving demands of both domestic markets. Our clientele includes fashion brands, garment manufacturers, designers, and bulk buyers who trust us for consistency, quality, and timely delivery.

What sets us apart is our dedication to craftsmanship, sustainable practices, and innovative fabric solutions. By blending traditional expertise with modern manufacturing techniques, we ensure that every meter of fabric reflects excellence.

OUR TEAM

A successful business is made by its people, which is why we take the efforts to identify the right people with similar mindsets, the passion for the business and the drive to work together.

A team of creative product designers, aggressive sourcing expertise, and highly technical production technicians produce impressive results.

We always strive to put the right people with the right skills in the right projects.

A grayscale photograph of a person climbing a tall ladder that extends from the bottom of the frame to the top. The person is seen from behind, reaching up towards a crescent moon in a cloudy sky. The ladder is positioned on the left side of the image.

OUR GOAL

Our Goal mission is to be a “one stop solution” to all customers in terms of design and creation, Timely delivers, manufacturing expertise at competitive price points.

Hence build an enduring relationship with our customers and clients and set our roots firm and leave no stone unturned to grow in every sphere of the venture.

SOURCING CAPABILITIES

We are able to provide a wide range of fabric collection to our customers, with competitive price points and aggressive leadtimes.

Our strong partnerships with mills all over India has resulted in establishing our own sourcing office in Bangalore.

We keep ourselves abreast with the latest trends through regular visits to mills and fairs across the globe. Access to various trend sites and trend books help us creating the latest collections in fabrics and apparel divisions. Our research starts at the grassroot level of fibres and yarns and goes upto finishing and washing of products.

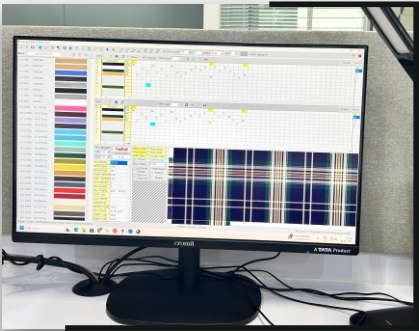

This way, the fabric trends become a reliable guide for determining the required changes in our business and strategy enabling us to meet 'PRODUCT DEVELOPMENT' demands of our customers with our sourcing strengths and network.

TREND RESEARCH

Staying connected with online trend companies and frequent visits to leading reputed fabric Mills and global apparel fairs, gives us foresight to upcoming trends and fashion forecast. this enables us to prepare collections for our customer presentations.

DESIGNING

Once we receive the trend research, Translating our product designs into CAD form, which is easier for sampling to interpret.

SAMPLING

CAD Booklet

showcasing its unique qualities, and providing compelling reasons for them to choose your product

SOURCING

Once we receive the trends research, the entire sourcing team starts working on fabric sourcing through our partnerMills.

WAREHOUSE

Our textile fabric warehouse serves as a central hub for the safe, efficient, and organized storage of a wide range of textile materials, including cotton, polyester, blends, and specialty fabrics. Located strategically in Bengaluru, the facility is designed to support both bulk storage and fast dispatch operations, catering to the needs of manufacturers, exporters, and retailers.

The warehouse has a storage capacity of approximately 10 Lakh meters of fabric. It features advanced racking systems, controlled ventilation to preserve fabric quality, and a digital inventory management system to track stock levels in real-time.

Inspection can be performed with the help of automated machines, depending on the production scale and accuracy requirements. Common defects include holes, stains, misweaves, color variations, and yarn inconsistencies. The process is usually carried out under controlled lighting conditions and may follow standardized systems like the 4-point or 10-point grading system to quantify and classify defects.
